Clover Farms Dairy

Allergen Policy

Products containing allergenic ingredients shall comply with FDA regulations concerning the procedures required to protect allergen sensitive individuals from the unintentional ingestion of such ingredients. The following criteria should be considered.

- Identification of known allergenic ingredients
- Labeling guidelines
- Processing and sanitation guidelines

Quality Assurance will provide technical procedures which define and guide production management in the requirements related to the safe processing and packaging of all products. Production management will maintain packaging and sanitation processes in accordance with procedures related to this policy.

Identification of Known Allergenic Ingredients

The following list contains primary and secondary ingredients used in Clover Farms Dairy products which may cause allergic reactions in individuals who ingest said ingredients.

Milk & Cream
Nonfat Dry Milk
Milk Protein Concentrate
Whey Protein Concentrate 80%
Whey Protein Concentrate 34%
Soy Protein Concentrate
Egg Nog Base

A complete list of all ingredients used in Clover Farms Dairy is available for full disclosure. However, to the best of Clover Farms Dairy knowledge, all ingredients other than declared allergenic ingredients, do not fall within the categories identified by FDA as a health threat for allergen sensitive individuals.

A master list of allergen ingredients is available at points of receiving for review. Only allergen material listed may be received.
